Summary

Senior Software Engineer with 5 YOE building enterprise and consumer web applications in Angular, React.js, Next.js and TypeScript for platforms serving 50,000+ users. Owns features end to end, from design handoff to production: reusable component libraries, REST and real-time (SSE/WebSocket) integrations, and Node.js/Express backend services. Builds AI-powered products including LLM integrations, RAG pipelines, streaming chat, an AI code-review tool and document-processing automation, along with Manifest V3 browser extensions for Chrome and Safari. Collaborates with design, backend and product teams in Agile/Scrum.

Skills

Frontend Development: React.js • Angular • Next.js • TypeScript / JavaScript • RxJS • SCSS

UI & Visualization: Angular Material • PrimeNG • Tailwind CSS • Bootstrap • Shadcn UI • Highcharts • Chart.js

State Management: TanStack Query • Zustand • Redux

Backend & APIs: Node.js • Express.js • REST APIs • SSE • WebSockets

AI & LLM: LLM / AI API Integration • Prompt Engineering • Streaming Responses • Embeddings • RAG • Vector Retrieval • Retrieval Evaluation • Guardrails & Citations

Cloud & Platforms: AWS • Browser Extensions (Manifest V3 – Chrome & Safari)

Experience

Senior Software Engineer, WattMonk Technology – Gurugram, IN — Nov 2024 – Present

- Built an order management system with AI-powered document parsing that auto-populates order forms from uploaded PDFs, reducing order time by **70%** and manual input by over **90%**.
- Architected the Ensite Workspace browser extension (Manifest V3) for Chrome and Safari from a single shared codebase, with a UAT pipeline using a private Chrome Web Store listing, staged releases and config separation from production.
- Own end-to-end frontend delivery across product initiatives, from design handoff to production; lead sprint planning and estimation in Agile/Scrum using Jira, and review code through Git-based PR workflows.
- Engineered AI-integrated product features in React and TypeScript, using TanStack Query and Zustand for data fetching and state, with live status updates streamed through SSE/WebSockets from Node.js/Express services.
- Integrated Google Maps API and built a DXF parser to extract site layouts from CAD files, automating [site mapping / design input] and reducing manual drafting effort drastically.

Software Developer, Stupa Sports Analytics – Gurugram, IN — May 2024 – Oct 2024

- Built a tournament management system for the European Table Tennis Union, integrating Angular modules with backend microservices via REST APIs for registration, fixtures, orders and invoicing across **4 federations**.
- Implemented multilingual (i18n) support and mobile-first design, optimizing performance during international tournaments.

Software Developer, Benepik Technology Pvt. Ltd. – Gurugram, IN — Apr 2021 – May 2024

- Developed a white-label web application for a leading insurance firm, used by **50,000+ advisors**.
- Implemented payment gateway integration for reward redemption & wallet top-ups, including webhooks, refunds & reconciliation.
- Launched a WhatsApp-based loyalty platform that grew adoption by **35%** in its first month.

Projects

AI Customer Support Resolution Agent – *LLM API, Gmail API, REST APIs* — Wattmonk

- Built an LLM-powered agent that ingests support emails via the Gmail API, extracts issue context and queries backend business-logic APIs to auto-resolve in-scope requests, escalating out-of-scope tickets to human agents.

Order Automation Extension (Chrome & Safari) – *Manifest V3, DOM parsing, Backend LLM API* — Wattmonk

- Built a browser extension that extracts page data, sends it to a backend LLM for field mapping, and auto-fills order forms while surfacing live order-status tracking; reported order-placement time reduction is approximately 70%.

RAG Document Q&A Application – *Embeddings, Vector Retrieval, LLM API* — Personal

- Built an end-to-end RAG pipeline covering document ingestion, chunking, embedding generation, vector retrieval and LLM answer generation, with persistent document storage.
- Added retrieval evaluation, guardrails and source citations to ground answers and reduce hallucinations.

Education

B.Tech - Computer Science & Engineering, Indira Gandhi University — 2017 – 2021
